# ISLETECH

# AUTO SERVICE

**TIP**

## DO YOUR WHEELS NEED BALANCING?

Bald spots on tires indicate that the wheel assembly and tire are not properly balanced. Proper balancing results in reduced wear on tires, shocks, and suspension. It also reduces noise and vibration and improves road adhesion, steering control and, control and fuel economy. If you've had a tire repaired and reinstalled, have it balanced. It's also a good idea to have wheels balanced before a road trip, to ensure a safe, comfortable ride.

**We'll match or beat any competitor's price!**
